## The best DIY amplifier, now made easy!

Congratulations on the purchase of your NC400 Mono kit. Soon you will experience the highest quality of music reproduction and best of all: you can build it yourself!

To ensure the best performance please read this manual first. It contains tips and tricks to guide you through the process of building your own NC400 mono block.

Warning: This kit operates at mains voltage and carries hazardous voltages at accessible parts. For safety instructions refer to the datasheets on our website.

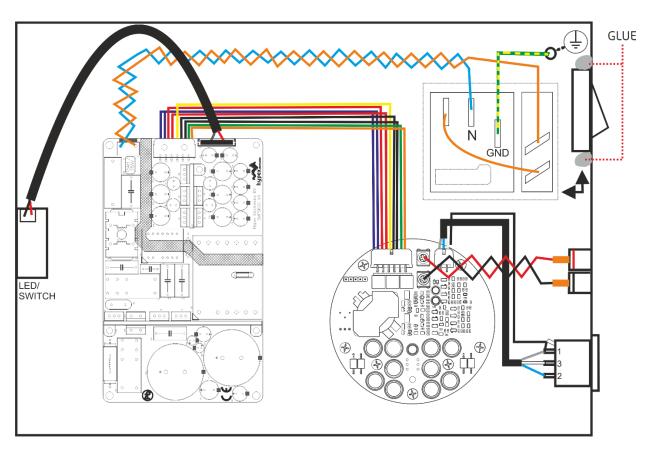

## Your NC400 Mono kit contains:

- 1x NC400
- 1x SMPS600
- 1x Case Hypex DIY mono
- 1x Mains input + ON/OFF switch
- 2x 5 AT fuse
- 1x Binding posts (red and black)
- 1x NC400 to XLR
- 1x Speaker wires (twisted red/black)
- 1x Internal mains wires
- 1x Protective earth cable
- This manual

## What you need to build it:

- Screwdriver PH and small FLAT head
- 2,5mm Allen key
- Cutting pliers
- Optional (supply by yourself):
  - Glue to fix mains input and switch

Please check the content of your kit before you start.

Before your start assembling this kit please mind the following:

We expect you have basic knowledge of electronics and you are aware of the dangers related to electricity. If you do not feel confident, please ask someone who has this knowledge to assist you.
